Listing of Claims

1. (Currently Amended) A steering wheel workstation support for a laptop computer, the laptop computer having a base and a display foldingly related to one another, the base having a front edge, the workstation support comprising:

a support portion, the support portion having a lower region and an upper region and a back and a front, dimensioned to support on its front at least the base of the laptop, wherein the support portion contains a plurality of arms, each arm terminating in a hook and wherein a crosspiece connects the arms;

a lip at the lower region of the support portion for receiving the front edge of the base of the laptop;

a hook arrangement disposed to hook onto a steering wheel in the upper region of the support portion; and

a standoff member, located on the back of the support portion, that is positioned to cause the lower end of the support portion to be displaced from a lower part of the steering wheel, the standoff member extending from the back of the support portion by first and second supports that meet at a junction behind the back of the support portion.

- 2. (Original) The steering wheel workstation support of claim 1, wherein the hook arrangement includes two hooks.
- 3. (Original) The steering wheel workstation support of claim 2, wherein each hook has a terminus that curves away from the support portion.
- 4. (Original) The steering wheel workstation support of claim 1, wherein the lip contains retainers disposed on opposite sides of a central region.

Appl. No. 10/685,293 Amendment dated December 15, 2006 Reply to office action of November 3, 2006

- 5. (Original) The steering wheel workstation support of claim 4, wherein the central region is void of the retainers.
- 6. (Original) The steering wheel workstation support of claim 1, wherein the support portion has height measured along its surface perpendicular to the lip of not less than 9 inches.
- 7. (Cancelled)
- 8. (Cancelled)
- 9. (Original) The steering wheel workstation support of claim 1, wherein the standoff member is configured in relation to the support portion to cause the workstation support, when in use on a steering wheel, to present the base of the laptop, to a user seated in a vehicle behind the steering wheel, at an obtuse angle relative to the horizontal, as measured from the front of the support portion, convenient to use of a keyboard on the base of the laptop.
- 10. (Original) The steering wheel workstation support of claim 1, wherein the standoff member has the shape of an inverted "V".
- 11.-18. (Cancelled)
